

Regardless of hardware type, measure to & from where spring touches frame.

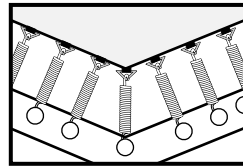

Select corner configuration:

Normal (as shown)

Normal with diagonal

Diagonal

Count spring attachments along one side.
If present, do NOT count the diagonal corner springs.

1. Length _____
2. Width _____
3. Spring count along one side _____

4. Find correct order form at <https://www.trampolineproshop.com/octagonal-frame-order.php>

We prefer to receive mat orders by mat measurement whenever the old mat meets these guidelines:

1. When collecting # 1 and # 2 measurements (shown above) be sure to follow the 'grain' of your fabric. To find the grain, look closely and notice the yarn runs in two directions from 12 to 6-o'clock and also from 9 to 3-o'clock. Measure in both directions following the path of the yarn.
2. If your old trampoline mat has a hole bigger than 1-inch directly in line with the fabric's grain, please order using frame & spring measurements on order form found at <https://www.trampolineproshop.com/octagonal-frame-order.php> the fabric's grain without spanning a hole greater than 1-inch. Order using this form if mat diameter measurement can be collected along
3. Measure with the grain even if the metal hardware along the edge of your mat is missing. If metal hardware is missing, add the appropriate distance to your measurement to account for the missing hardware
4. Mat can be measured while installed or while laying flat. If measured off the trampoline, gently pull the mat flat while measuring.
