

1. Width where spring touches mat.

2. Height where spring touches mat.

3. Overall width to fabric edge.

4. Overall height to fabric edge.

5. Count elastic straps across top.

6. Count spring connections across top.

7. Count spring connections down one side.

8. Count elastic straps down one side

9. Find correct order form at <http://www.trampoline-1.com/lacrosse-rebounder-mat-order.php>

We prefer to receive orders using mat measurement when original mat is suitable for measuring. See if your mat qualifies here.

Please Note:

1. Collecting frame measurements requires two people.
2. Hold the measuring tape tight. Do not let the tape sag.
3. Do not lean against the frame while measuring.
4. When measuring frame, measure to and from where the spring hooks the frame. Usually springs hook into spring holes drilled it have pieces of zig-zag wire welded to the inside edge of the frame. Regardless, measure to and from where the spring hooks the
