

Buy Round Mat With Mat Dimensions

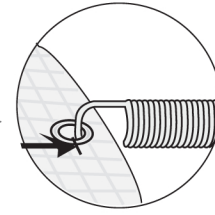

Need help?
1-800-586-7456

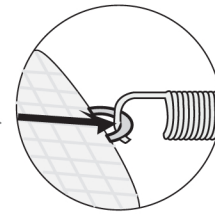

Select perimeter hardware type:

☐ Metal
triangles

☐ Grommets

☐ Others

Regardless of hardware type,
measure to & from where
spring touches mat

1. Diameter 1 _____

2. Diameter 2 _____

3. Spring Count _____

4. Find correct order form at <https://www.trampolineproshop.com/round-mat-order.php>

Measurement Guidelines:

1. If your old trampoline mat has a hole bigger than 1-inch directly in line with the fabric's grain, please order using frame & spring measurements on order form found at [trampolineproshop.com/round-mat-order.php](https://www.trampolineproshop.com/round-mat-order.php) Order using this form if mat diameter measurements can be collected along the fabric's grain without spanning a hole greater than 1-inch.
2. When collecting # 1 and # 2 measurements (shown above) be sure to follow the 'grain' of your fabric. To find the grain, look closely and notice the yarn runs in two directions - from 12 to 6-o'clock and also from 9 to 3-o'clock. Measure in both directions following the path of the yarn.
3. Measure with the grain even if the metal hardware along the edge of your mat is missing. If metal hardware is missing, add the appropriate distance to your measurement to account for the missing hardware
4. Mat can be measured while installed or while laying flat. If measured off the trampoline, gently pull the mat flat while measuring.
